TIMBERS

# About Us

## COMPANY

Architectural Aluminium celebrates twenty-nine years of operation in the construction industry. The organisation began operations in Zimbabwe in 1994 with the first premises as a backyard business on Williams Way in Msasa Harare. The founder and CEO, Mr David Stally had a vision to make it the most reputable aluminium and shop fitting company in the region. Twenty-nine years on, the journey continues. Architectural Aluminium has become the most reputable shop fitting and aluminium company in Zimbabwe.

## OPERATIONS

There are two main teams that operate within the organisation, residential and commercial projects team. Residential team works mainly on domestic dwellings, delivering custom made products and services to individuals whilst the commercial team works closely with architects, quantity surveyors, contractors, realtors and construction projects departments in organisations. Both teams are skilled and well trained in their respective divisions to deliver quality products and services. The production factory is in Willowvale, it has a specialised production line equipped with machinery for each stage of production from cutting to assembling. The head and sales office operates from 25 Connaught Road, Avondale in Harare where it also houses the estimating and design team.

Architectural Aluminium works closely with its sister company Lupane Timbers which manufactures standard and custom made hardwood, teak, mukwa doors and windows. Its factory is located in Msasa Business Park. Products from both companies complement each other in the building finishes stage.

In the 29 years of distinctive service to our clients Architectural Aluminium takes pride in having successfully completed building facelifts in the major CBDs of Zimbabwe as well as more than 1000 residential stands.

## OUR GUARANTEE TO YOU

Architectural Aluminium undertakes to execute all its work within strict international construction standards to ensure maximum benefits from your investment with a five year warranty on installations. The company offers more than just aluminium and glass building finishes, we employ a team that's constantly on the design table to provide innovative solutions for property owners and corporate clients that do not want to compromise on quality.
